

MAROC OE2010 Training

Introduction

- At first sight OE2010 can look daunting – lots of windows, icons, and menu items

The screenshot shows the OE2010 software interface with multiple windows open. A large blue watermark with the text "Don't Panic!" is overlaid across the center. The interface includes a menu bar at the top, a toolbar, and several data tables and settings panels. The main window displays a table of entries for a competition, with columns for Chip no, Start time, First name, Start fee, Post, YB, Sex, and Club. Other windows show settings for chip systems, reports, and a grid for marking results.

Chip no	Start	First name	Start fee	Post	YB	Sex	Club
120	9:30:00					M	

Input Club	Chip no	Chip no	Surname	First name	Sex	DOB	Post
1	NGD		Anna	Chloe	M	09/05/03	
2	NGD						
3	NGD

Learning outcomes

- Hands-on training after which you will understand:
 - OE2010 terminology: events, entries, chips,
 - how to create an event
 - how to create & modify entries
 - how to generate a start list
 - how to handle downloads
 - how OE2010 matches brikkes to entries
 - normal downloads
 - problem downloads
 - e.g. wrong course, missed punches, different brikke, ...
 - how to check for missing competitors
 - how to generate preliminary and final results
 - how to export results for BOF and for RouteGadget
 - how to backup an event

OE2010 terminology

OE2010 terminology

Event

Course

Class

Control

Entry

Chip

OE2010 terminology – Event

Event

- Description of event
- Date of event
- Details of timing system (EMIT)

OE2010 terminology – Course, Control, Class

Course

- Description of course
- Length
- Climb
- Controls on course

Class

- Each competitor runs in a class
- One or more classes associated with each course
- For local / regional events we have one class with the same name as each course (e.g. “Blue”)
- For national events such as SOLs we have multiple classes associated with each course (e.g. age classes M16, W18, W20, M55, M60, M35S, M40S, W35, W40 all on Blue course)

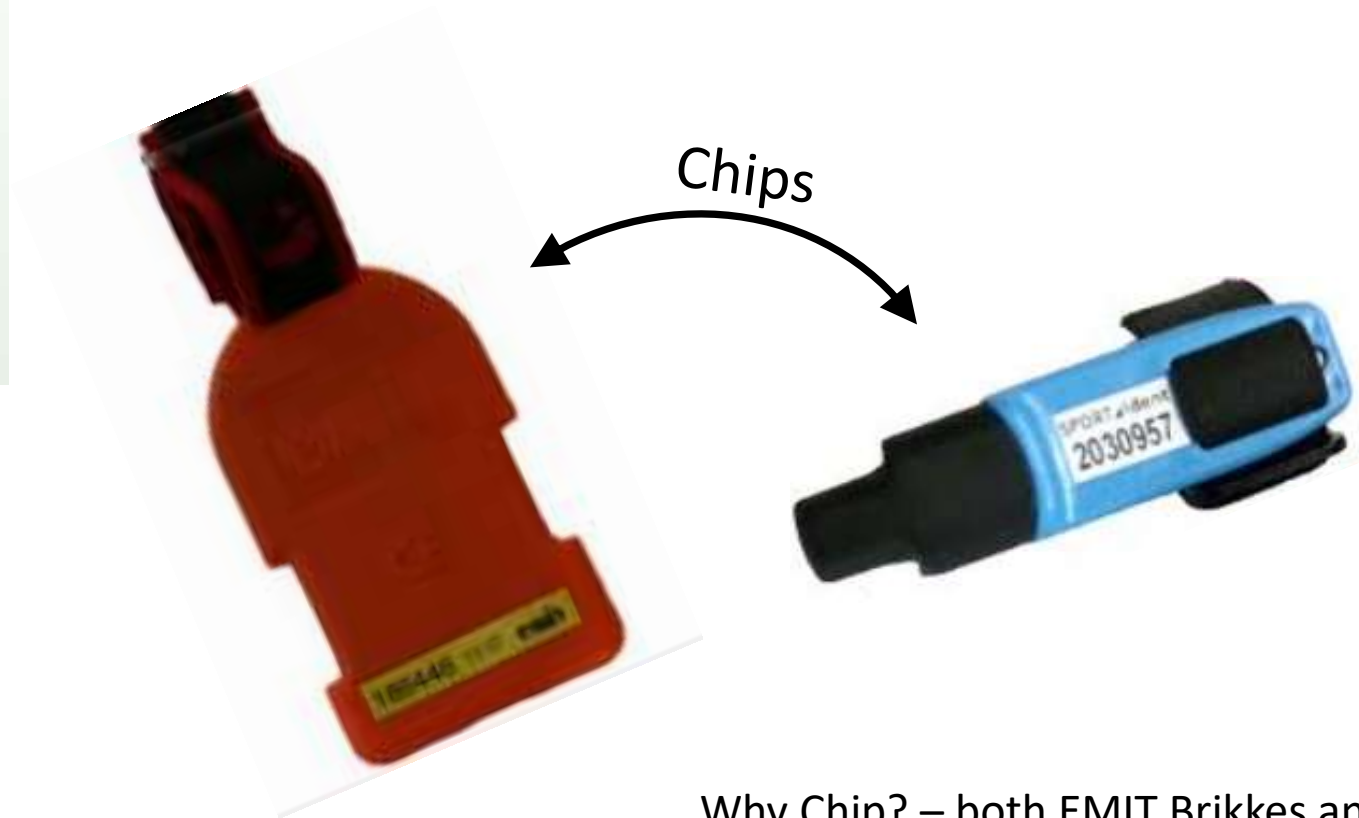

OE2010 terminology – Chip

Chip

- BRIKKE!

Why Chip? – both EMIT Brikkes and SI Cards contain electronic timing ‘chips’

OE2010 terminology – Entry

Entry

- Competitor name
- Age, gender, year of birth
- Club
- Start number
- BOF number
- Age class (e.g. M55)
- Class entered
- Chip

-  • Separate entry for each class entered by a competitor
 - At colour coded events a competitor may run more than one course – separate entries
-  • OE2010 creates additional entry with surname “Reserve” when downloading a brikke it can’t match to an entry
 - There can be multiple “Reserve” entries

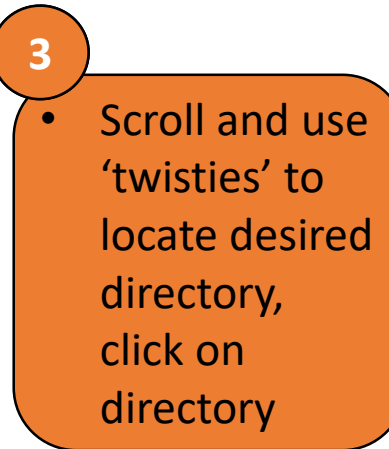

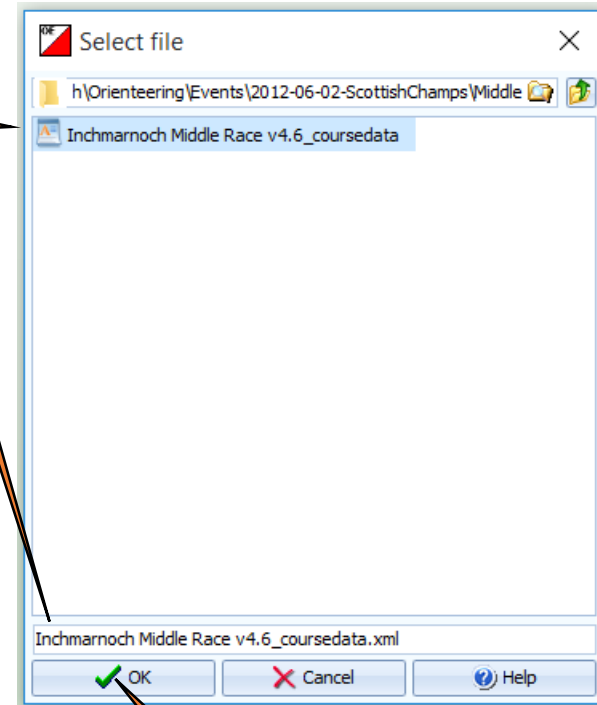

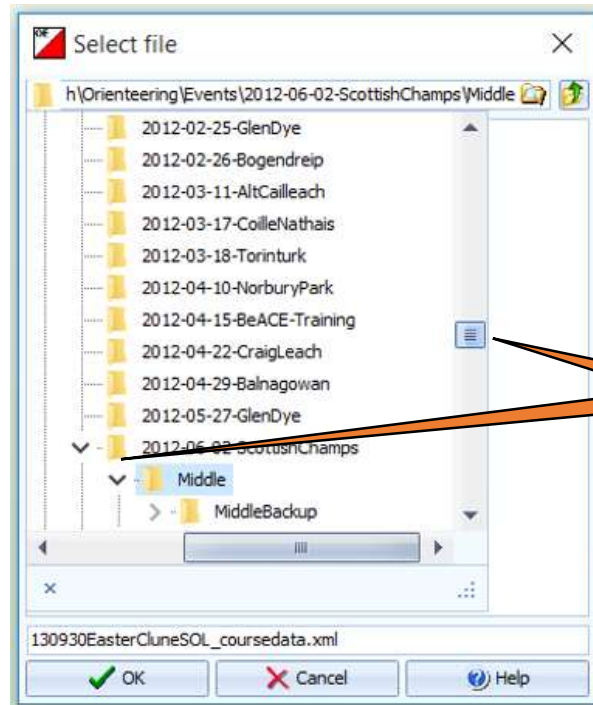

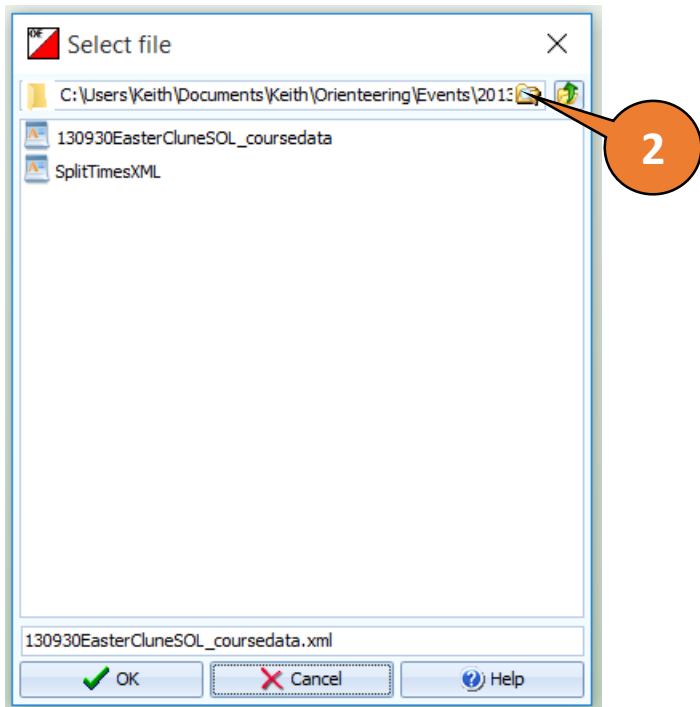

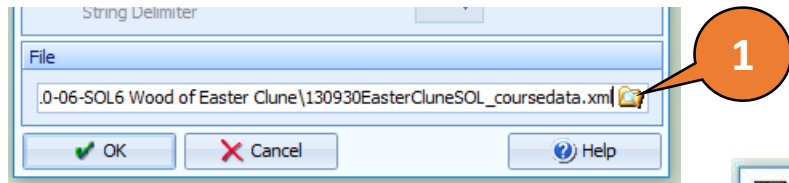

Create an event

Basics - Navigating directories

- One of the least intuitive features of OE2010!

Basics - Selecting visible columns

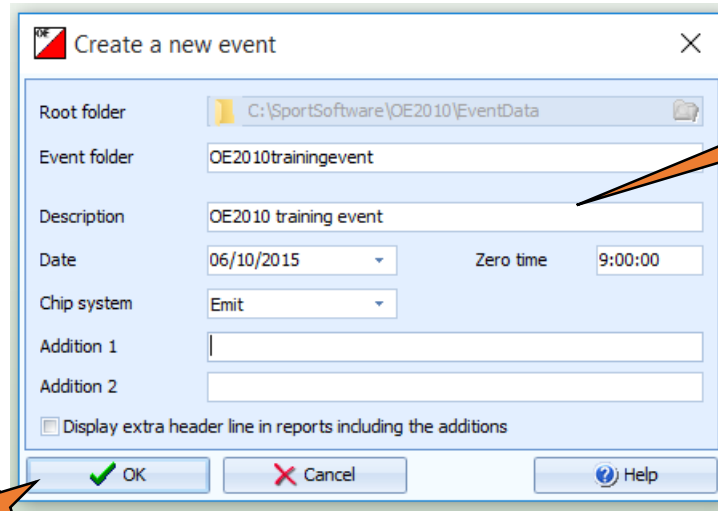

The screenshot shows the 'Entries' application window. The main area contains a table with columns: Input, Start no, Start, Chipno, Surname, First name, YB, Sex, Class, Entry class, Club, Start fee, Course, Db Id, nc, and Text1. The 'Settings' pane on the left lists these columns with checkboxes to toggle their visibility. An orange callout bubble points to the 'Settings' pane with the text: 'Check / uncheck which columns you want to be visible'. The status bar at the bottom shows 'Entry of the day' and 'BOF 02/11/2015 <C:\SportSoftware\ArchiveData\BOF>'.

Generate a start list

Generate a start list

You will need a start list when you are using 'Early Electronic Entries' (EEEs). The start number will be used to associate the brikke with the runner at download.

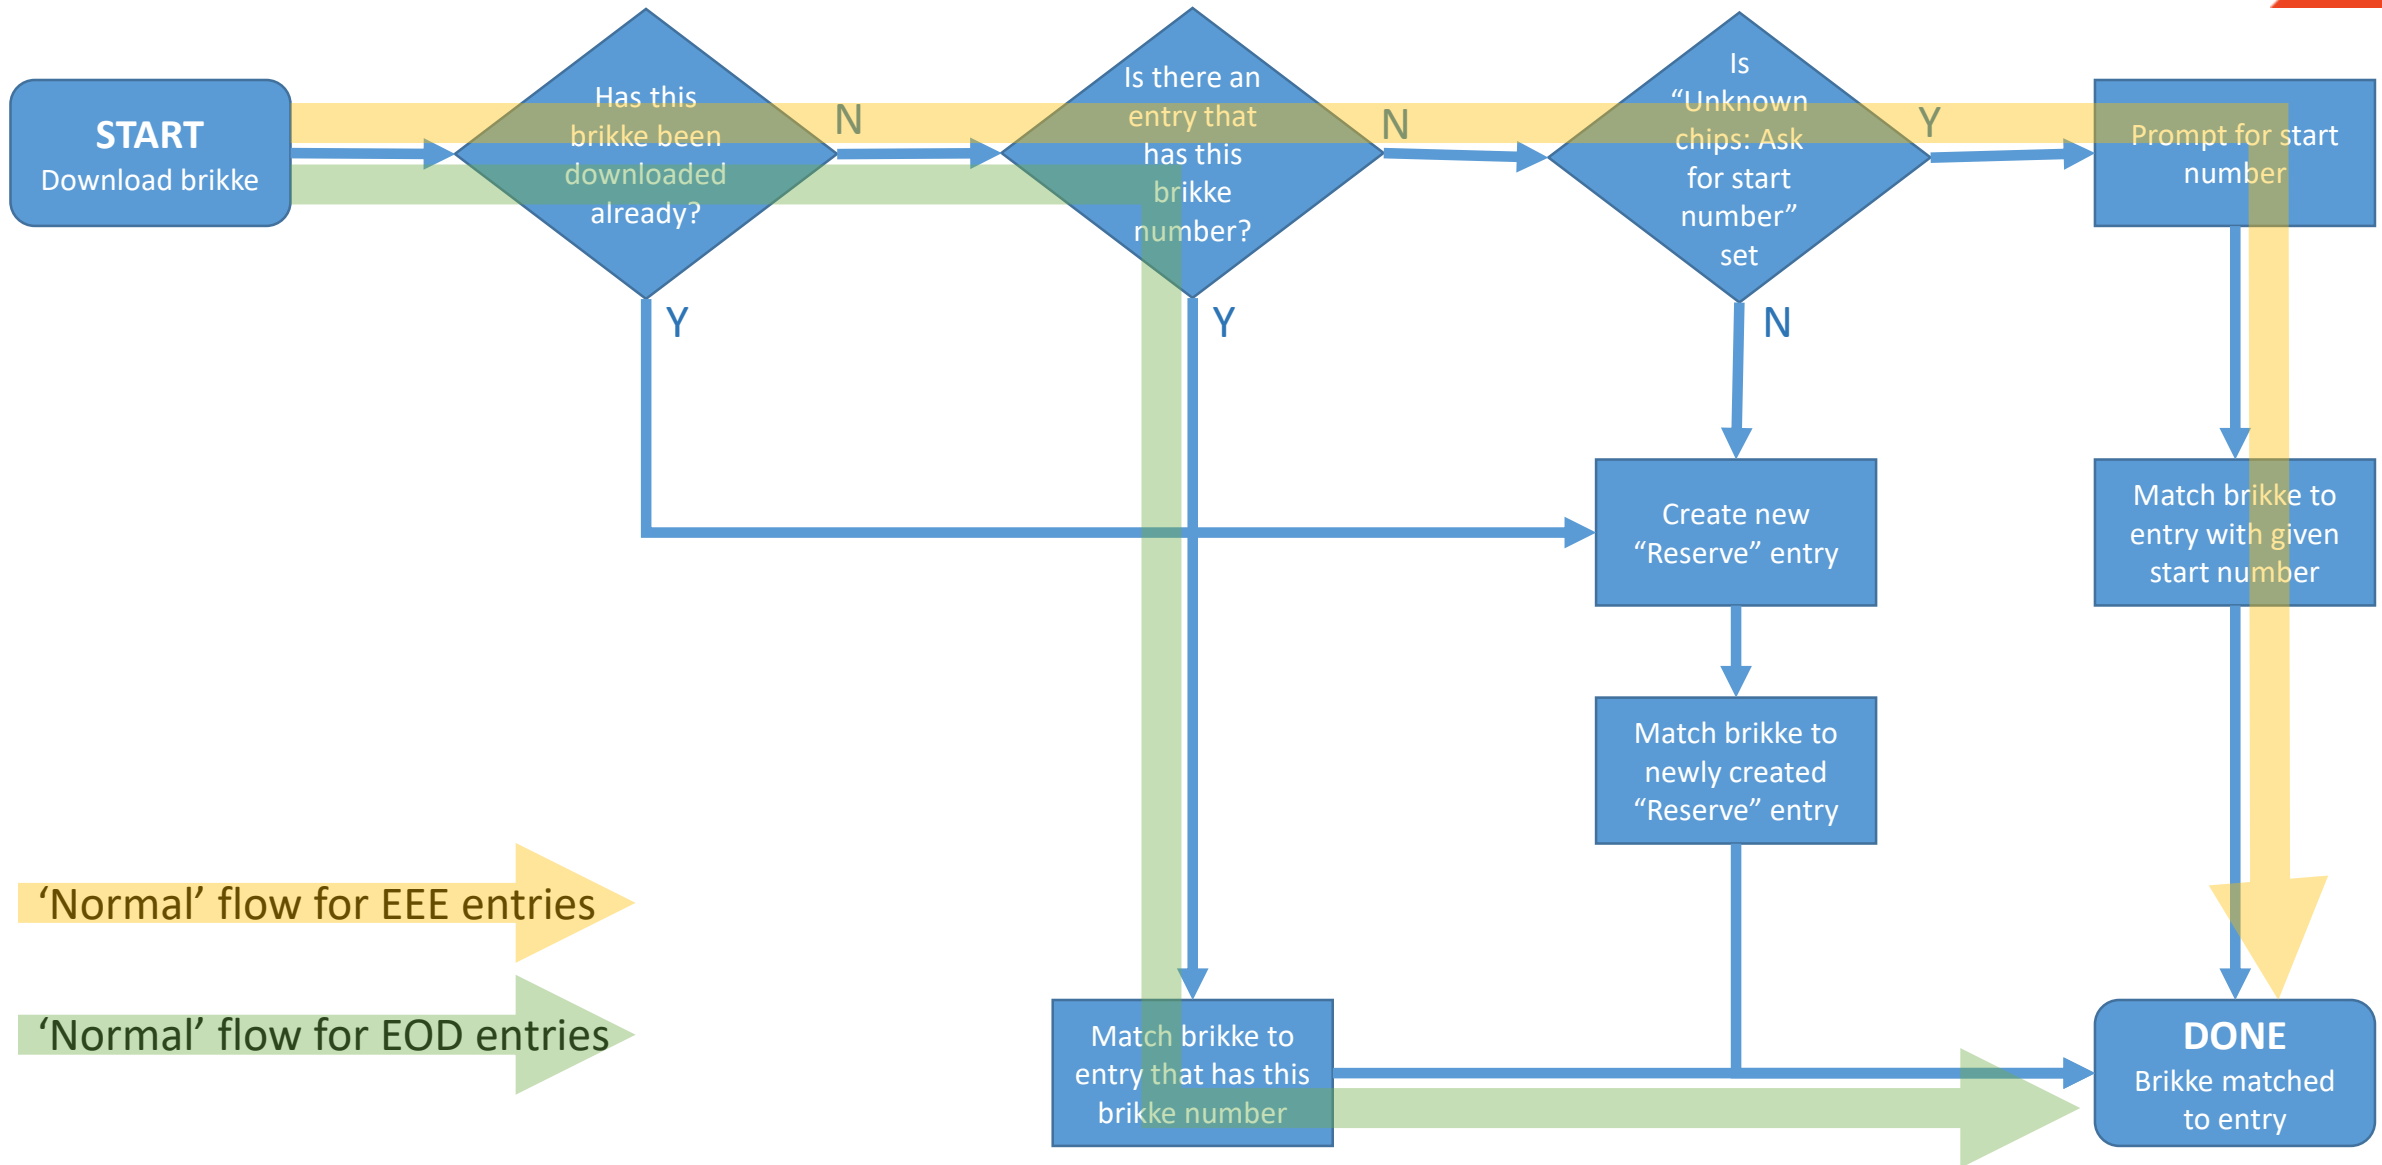

Two start lists are printed: one is used by registration where each EEE'd competitor is scored off when they register, and one is used by download to look up an EEE'd competitor's start number when they download.

N.B. these start lists are only used for EEEs and do not get sent to the starts. A different form of start list is generated and used for Level A allocated start times.

Downloads – problems!

- Problem?** • Runner ran a different course
- Solution ✓** • Modify entry – change to correct class for course run

- Problem?** • Wrong start number entered and need to move splits to correct entry
- Solution ✓** • Move times to correct entry

- Problem?** • Different brikke number in EOD entry (e.g. mistyped)
- Solution ✓** • Modify entry – correct the brikke number
- Solution ✓** • Move times to correct entry

- Problem?** • Two runners had swapped brikkes
- Solution ✓** • Exchange times between entries

- Problem?** • Runner to be re-instated (e.g. “I definitely, definitely, definitely visited that control!!”)
- Solution ✓** • Modify classification in Evaluate Chips to ‘OK’ and Save

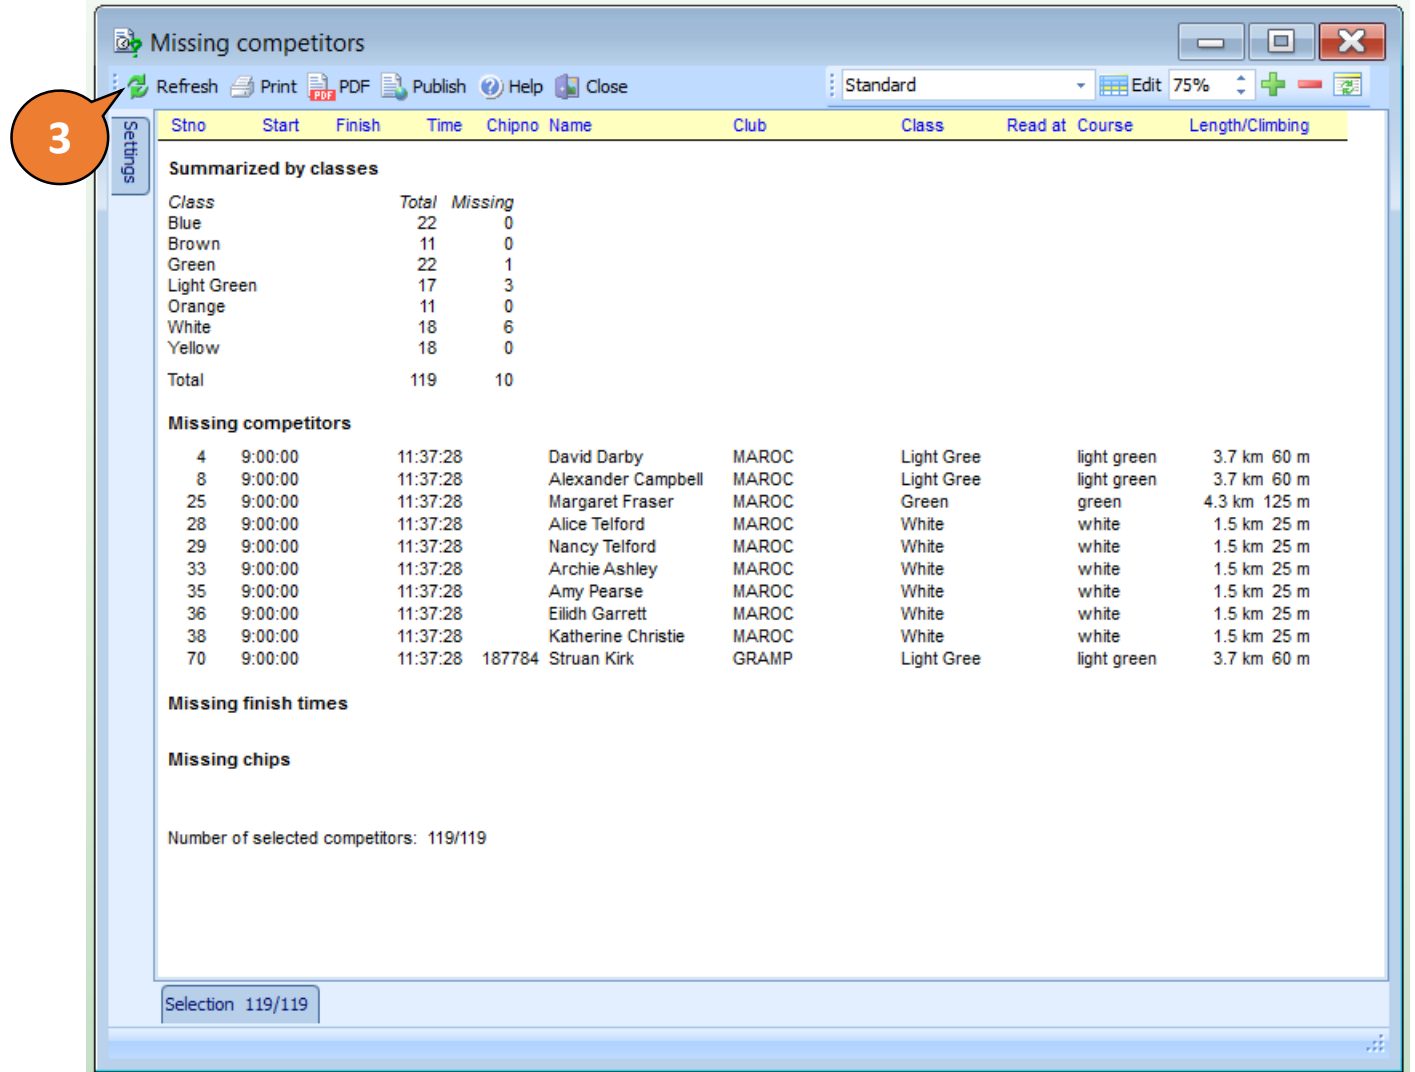

- Problem?** • Brikke has been re-used accidentally or deliberately (if short of brikkes)
- Solution ✓** • Click “No” when prompted “chip will be overwritten” creating Reserve entry
- Solution ✓** • Move times to correct entry

Check in Evaluate Chips after all corrections, and reprint splits sheet

Check for missing
competitors

Check for missing competitors

Set classification for any EEE entries that did not show up to 'dns' using Evaluate Chips to remove them from missing competitors

A PDF of the split times is sent to the MAROC webmaster for uploading to the website

Export results for BOF and RouteGadget

Export results for BOF and Routegadget

5 • Set 'File Format' options as shown

6 • Select location and name of file in which to save results

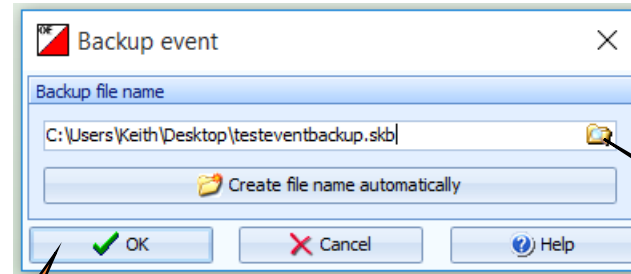

The results export CSV file is sent to the MAROC results secretary for uploading to the BOF website and for uploading to RouteGadget (along with the course data XML file and map image file)

Backup an event

Backup an event

3

- Select location and name of file in which to save backup – normally this would be in the appropriate events folder, but could be to a usb drive

MAROC OE2010 Crib Sheet

Before the event

- ▲ Create new event
 - ▲ configure for EMIT
 - ▲ import courses
 - ▲ define classes
 - ▲ assign courses to classes
- ▲ Backup the event
- ▲ Update archive if required
- ▲ Create entries for EEEs (without brikke numbers)
- ▲ Generate a start list

At the event

- ▲ Create entries for EODs (with brikke numbers)
- ▲ Download brikkes as runners finish, enter start nos. for EEEs when prompted
- ▲ Handle any download problems
 - ▲ edit entries to correct classes, brikke numbers, clubs, etc.
 - ▲ move times from one entry to another
 - ▲ move time from 'Reserve' entries to the appropriate entries
 - ▲ reprint splits sheets if required
- ▲ Print results periodically
- ▲ Check for missing runners
- ▲ Backup the event

After the event

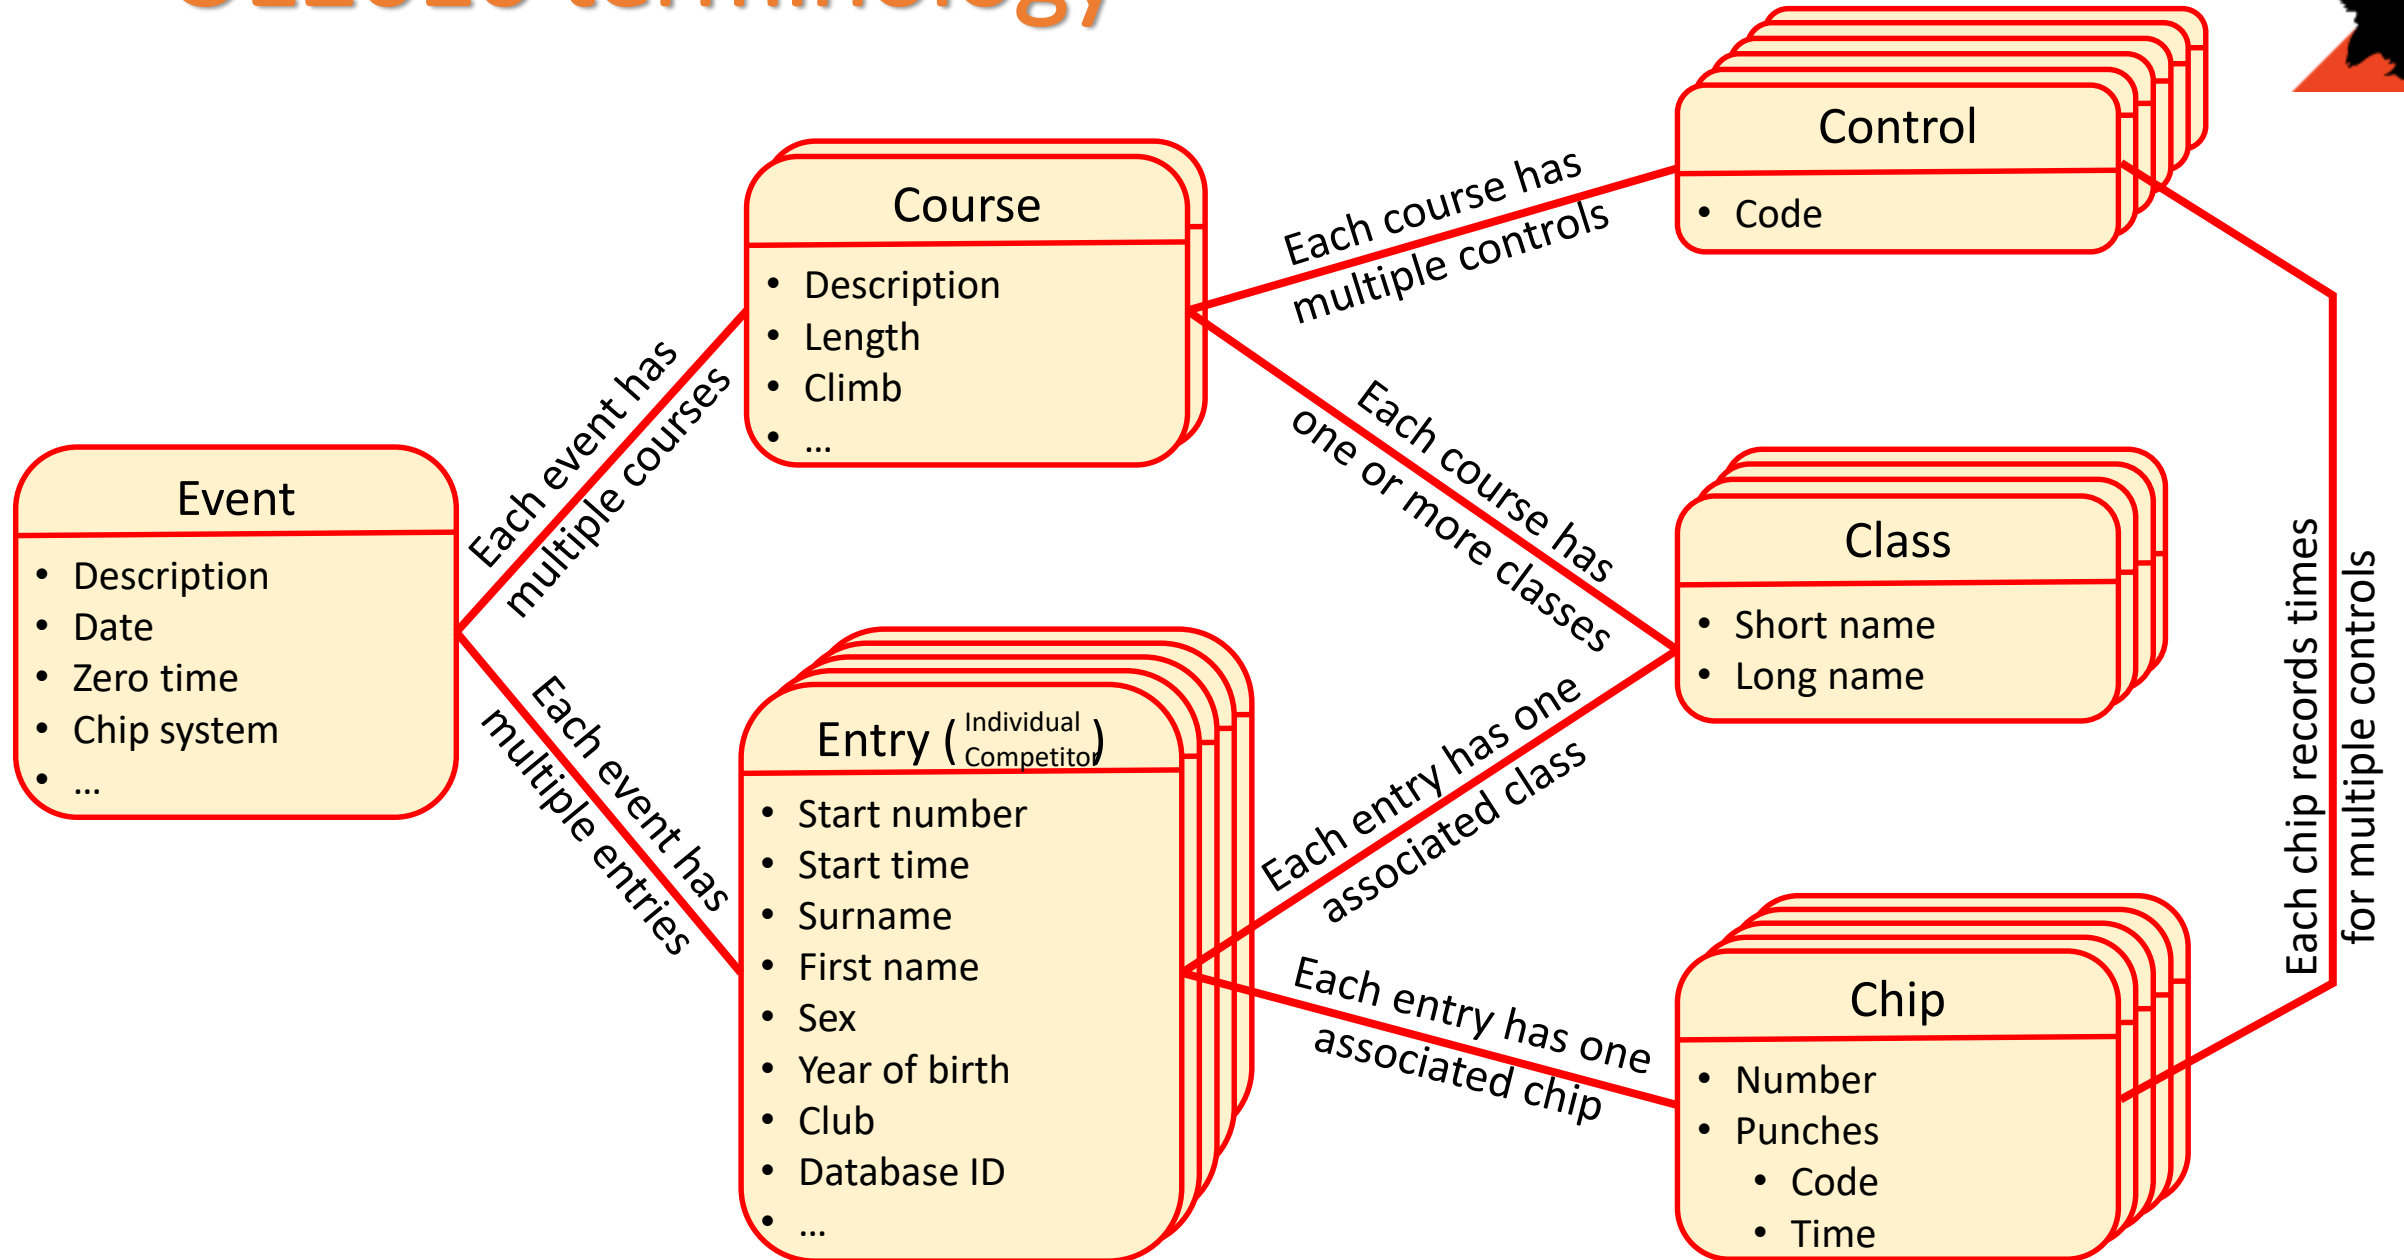

- ▲ Generate PDF of simple results to go on website
- ▲ Generate PDF of split times to go on website
- ▲ Export CSV of results to be uploaded to the BOF website
- ▲ Export XML of split times to be uploaded to RouteGadget
- ▲ Backup the event

The screenshot shows the 'Managing report layouts' dialog box. At the top, there are buttons for 'Optimize', 'Reset', 'Repair', 'Help', and 'Close'. Below these are 'Source' and 'Destination' fields with folder icons. A double-headed arrow between them is labeled with a callout '7'. Underneath, there are radio buttons for 'Reports' and 'Labels', with 'Labels' selected. The main area is a table with columns for 'Selected', 'Source', and 'Destination'. A callout '8' points to the 'Selected' column where a checkbox is checked. The table contains one row with the following data:

Selected	Source	Destination
<input checked="" type="checkbox"/>	Read chips - COM5: L0=Split time sheet horz. A4(3) L1=Split time sheet vert. A4(1) L2=Split time sheet vert. A L005500902.skbl 08/11/2015 16:36:51	Split times by classes L0=Split time sheet horz. A4(3) L1=Split time sheet vert. A4(1) L2=Split time sheet vert. A L005500902.skbl 08/11/2015 18:01:26

At the bottom of the dialog, there are buttons for 'All', 'None', and 'Copy'. A callout '9' points to the 'Copy' button. The status bar at the bottom left reads 'Source / Destination / Selected: 1 / 1 / 0'.
