SiTiming with DNC events

during covid-19

Revised 22nd November 2020

Terminology

Database	The server/program that holds all the event information
SI-Card Archive	A list of all known competitor and their assigned SI-Cards (includes competitors from BOF without SI-Cards)
Competitor	A name, year of birth, BOF/SOA number, etc
Entry	A Competitor registered in the event
Entry by punch	The process of a competitor entering the event by punching their SI-Card at registration
Non-competitive	Anyone who is not eligible to win (includes people being shadowed)
SI-Card	Carried by a competitor to record their time. Also know as a dibber
SI-Station	A unit/piece of equipment that can perform an action on an SI-Card (e.g. clear, a control)
SI-Master	The blue display top SI-Station ("SI-Master" written on it). It acts as a TimeMaster and as a Clear SI-Station
SI-Master USB	Any wired SI-Station
Mini-reader	A type of SI-Master USB - blue wired with "mini-reader" written on it
Printout Station	A type of SI-Master USB - black and yellow wired (multi-purpose)

Understanding this document

Event list >> Add single stage event

1. At the top right of each page there will a section title

2. There will be a page title

3. On each page of these slides there is a directory stated. Use this to navigate to the correct page in SiTiming.

4. There are page numbers in the bottom right corner

Contents

- Part 1 - On any laptop
  - Interrogate download station*

These items are presented in the order that they should be executed in.

* Must be done

- Part 2 - On a Maroc laptop
  - Connect to database*
  - Create event*
  - Select event*
  - Import courses*
  - Import downloads file* (Includes adding entries)
  - View entries
  - Edit an entry
  - Validate the event
  - Solve problems
  - Set event results as final*
  - Results (HTML)* (for the website)
  - Results (CSV)* (for BOF & Routegadget & Contact tracing)

Part 1 - On any laptop

With SiTiming downloaded (database server not needed)

This can be done on either, your own laptop with SiTiming downloaded, or on a Maroc laptop

Interrogate download station (part 1)

1- Open SiTiming
2 to 3- Using the navigation menu on the left go to:
Database Connection >> SPORTident Utilities >> Printout Station backup Reader
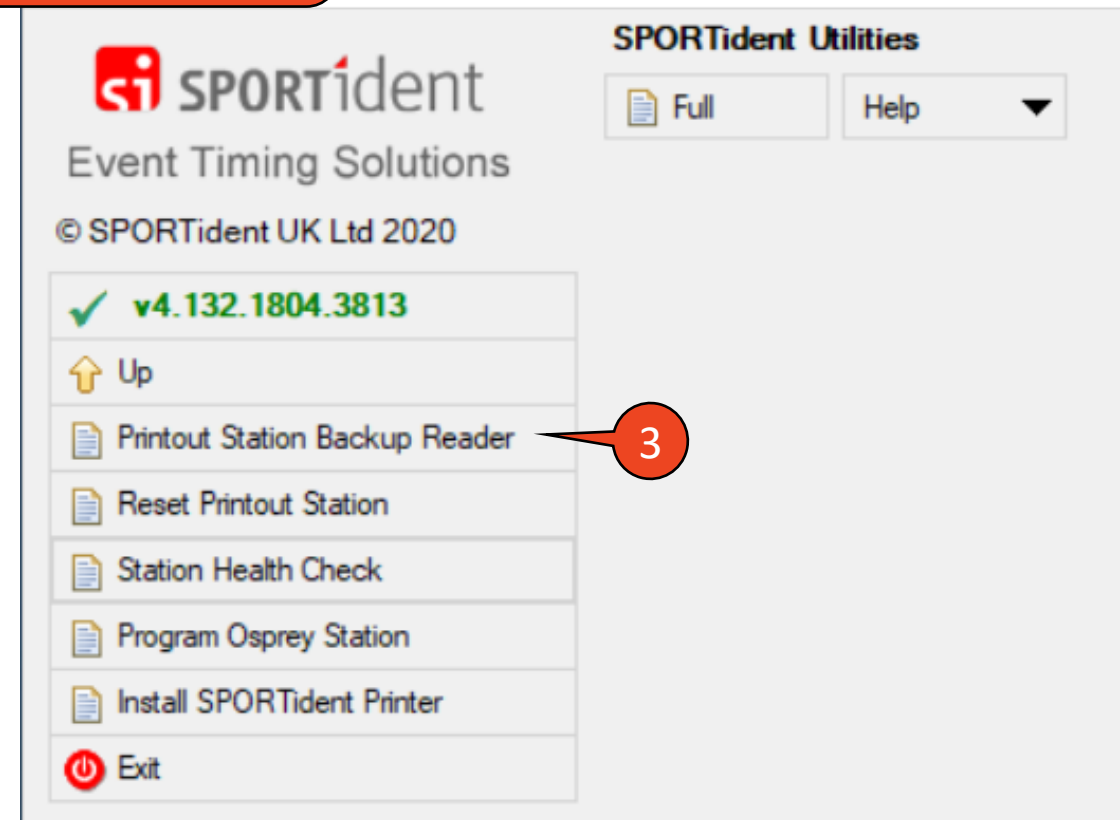

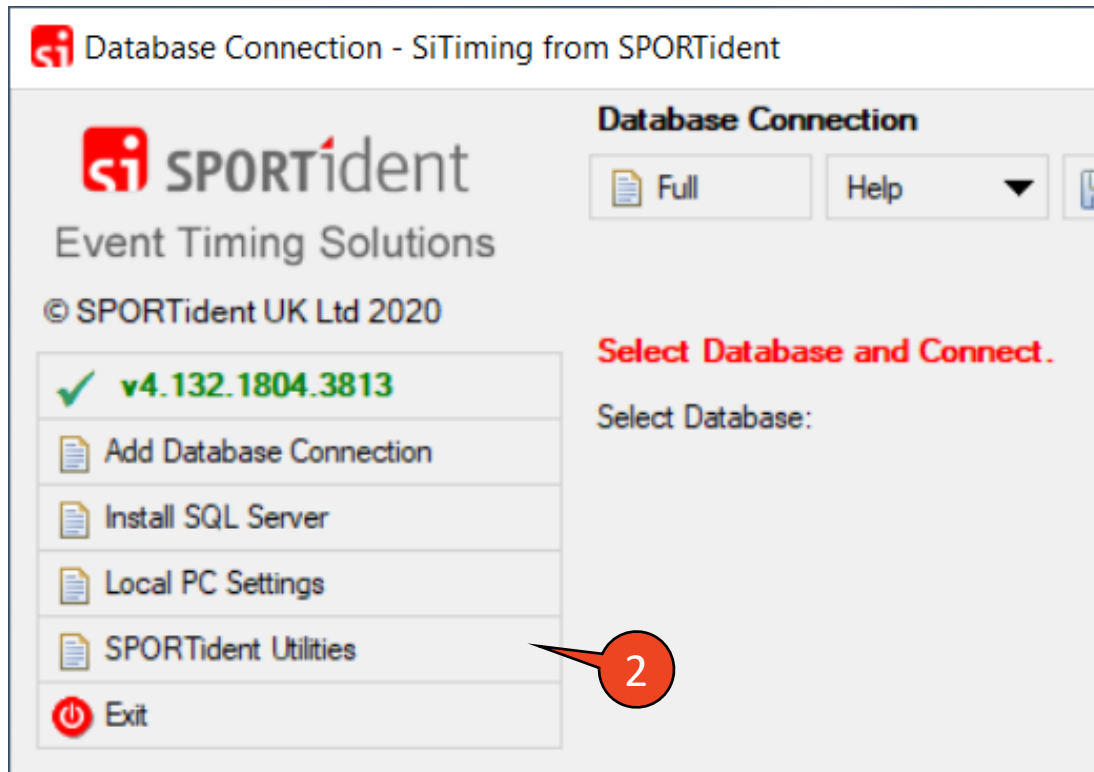

Interrogate download station (part 2)

1- Plug in the Download Station to the computer
2- Select COM port. Try the automatically selected COM port first. If that fails try each COM port in turn. If the application freezes, see help video for further help.

Import successful.

Import downloads file (Part 1)

Event overview >> Data Collection >> Downloads >> Process Printout Station Backup

1- Select downloads file
2- Click 'Read File'
3- Set Download Mode to 'Automatic, Manual on Error'
4- Select earliest punch of the event
5- Click 'Save and Process'

Note. Red crosses will **not** be imported. Green ticks **will** be.

Import downloads file (Part 2)

Import will begin.

If the software recognises an SI-Card it will automatically create an entry for the competitor and link the result to it (It uses the SI-Archive which includes the bof database as a reference). This is done without your interaction (done in the background).

If an entries page (see right) appears but with most of the fields filled in automatically. Edit these as necessary to make sure they are correct. Then click 'Save New Entry'.

If an entries page (see right) appears without details filled in, this means it is a hire SI-Card. Copy the SI-Card number (ctrl + c). Remove the SI-Card number. Enter the competitor's full name who used that hire SI-Card number. Click 'Search' at the top. If a list of competitors appears, select the correct competitor. If no list appears type in details into each field (see right) manually. Paste (ctrl + v)/re-type in the correct SI-Card number. Check that all fields are correct. Click 'Save New Entry'.

📖 Read File

2 downloads saved, including:

2 results saved complete.
0 results saved with no course/class.
0 downloads are unidentified.

Confirm success

View entries

Event overview >> Entries

1 - Specify search criteria
2- Click 'Search'

Note-
Leave all fields blank to view the first 50 competitors.
Set the Maximum Number to Return to 'All' to view all.
'Clear' will clear the search criteria.

Edit an entry

Event overview >> Entries >> Select competitor >> Modify Entry

1- Edit as required
2- Click 'Save Entry Changes'

Note- Competitor details cannot be edited from the 'View Entry' page

Validate the event

Event overview
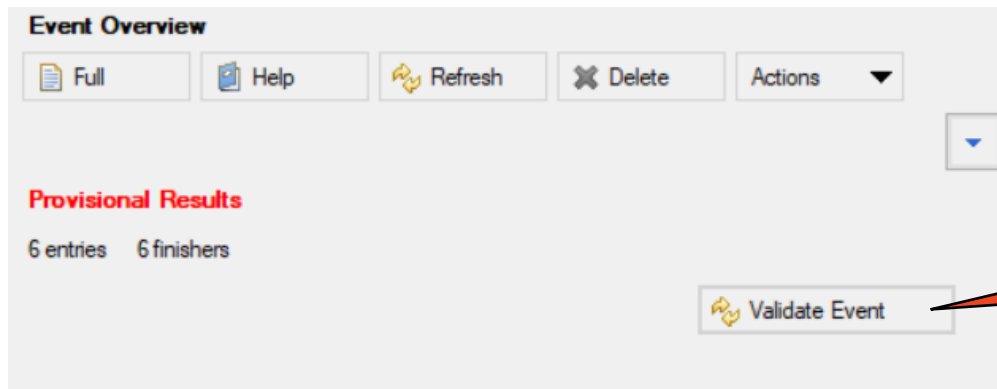

6.1 Validate Event

"Validate Event" checks the status of the event and displays the results in a "tree" format. The event is not automatically validated when you enter the screen to improve performance.

- **Green** is good
- **Blue** is for information
- **Red** is a warning. Something may not be as expected and **may** need some action.

Some points in the tree have an arrow button which can be clicked to go to the relevant screen.
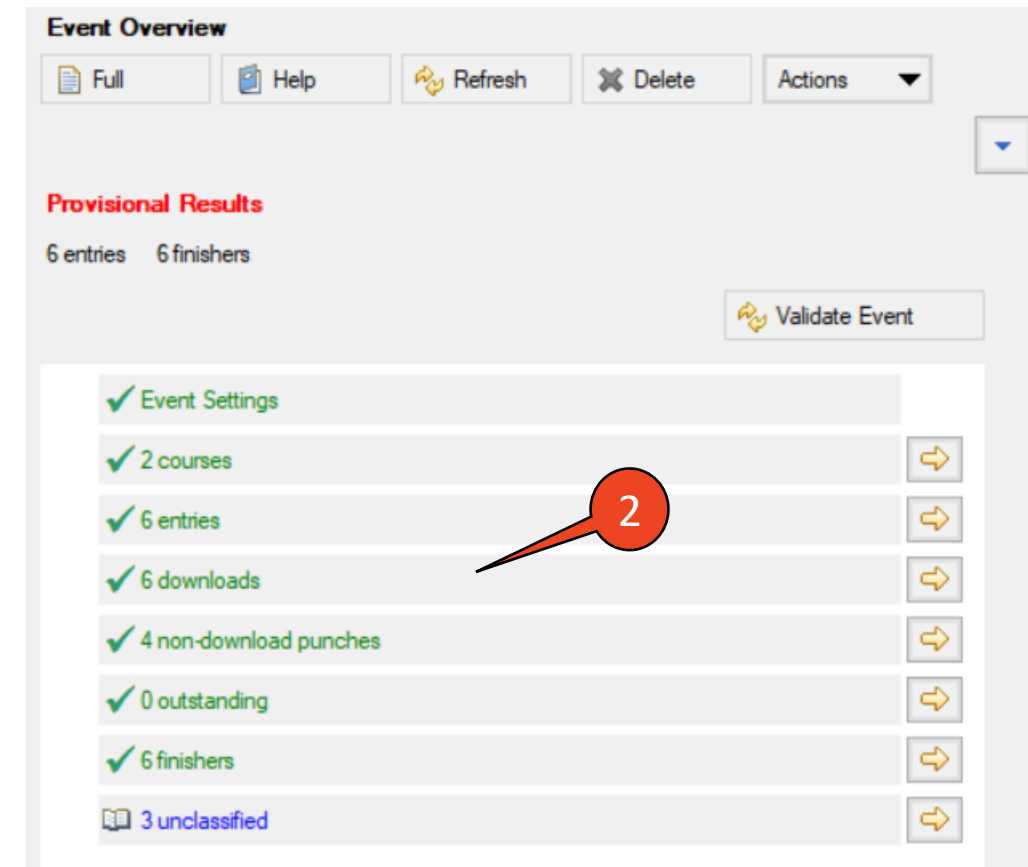

Solve problems

See "SiTiming download & other problems guide"
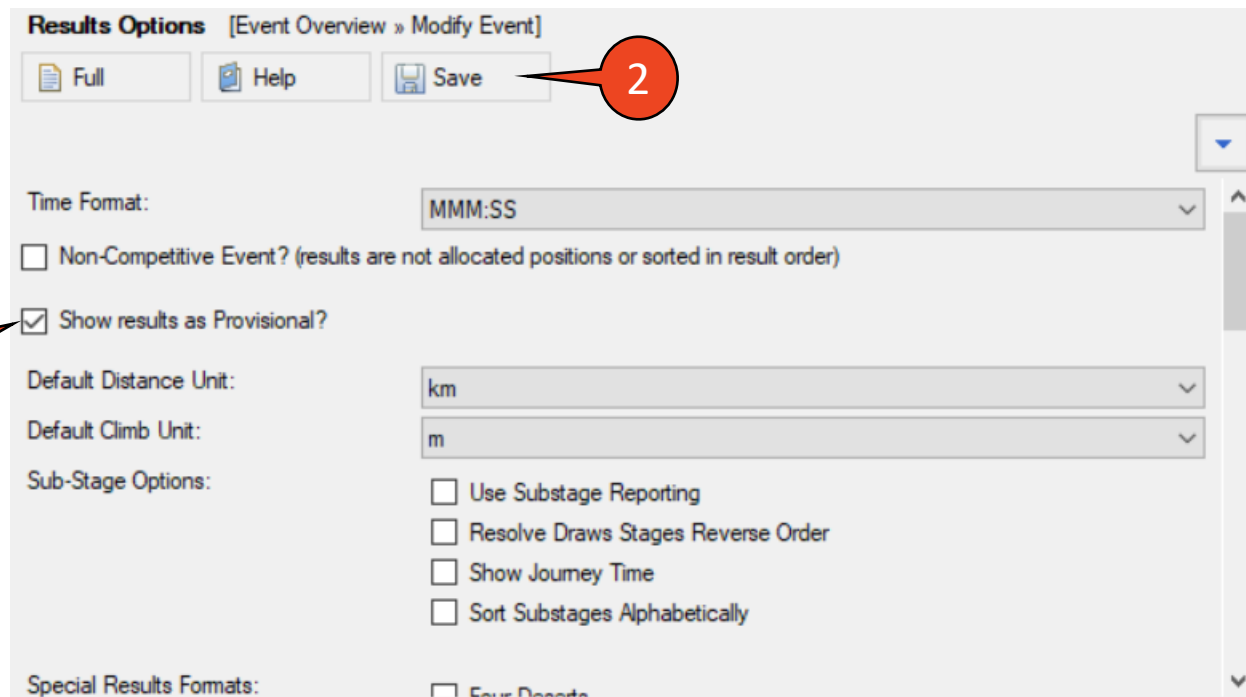

OR

See section 15 in the SiTiming user guide

(Accessed from the help button at the top of any page)

Provisional results -> Final results

Event overview >> Modify event >> Results Options

Results are automatically given the label 'Provisional' until this is unselected, after which they are official.

The event should be marked as not provisional once **all** issues are resolved.

1- Uncheck 'Show results as Provisional'
2- Click 'Save'

Results (HTML)

Event overview >> Results >> HTML Results

1- Make sure 'Create local' is selected
2- Select location to save results
3- Make sure Results is selected
4- Make sure Split Times is selected
5- Make sure all courses are selected
6- Click 'Write Now'

Note-
Results will be in .html file format. Not PDF.
When checking the .html file for results,
make sure the laptop is connected to the
internet first.

Upload Type:	Create Local
Folder:	
Data Mode:	Internal
Index Filename:	index
Not Started Message:	Results will be added here soon after the event has taken place.
